This is the story of a girl who turns all magic spells into washbasins. Morishita Koyomi certainly has things tough. Even though she's in high school, she's so short that everyone assumes she's still in grade school. But don't get her mad or she might drop a washbasin on your head! In a world where magic is like a computer code, Koyomi still hasn't learned BASIC. Then again if learning magic was easy it wouldn't be magic... wow does she have a long way to go.
